ON THE COVER

Inset: This photograph was taken at Sweet Arrow Lake County Park in Schuylkill County, Pennsylvania. This waterfall is located in the southern portion of the park where the Montebello Sandstone meets the Mahantango Shale Formation.
Background: The water erodes away the softer shale at the bottom of the waterfall, causing a 15-foot (4.57 m) drop at the vertical join in the sandstone. *Photographs by Priscilla Clark, Shippensburg University, October 8, 2015.*
